SpearTek Tile and Stone is one of the fastest growing importers and distributors of decorative natural stone and tile in the southeast. SpearTek is headquartered in Atlanta, Georgia and has an office in Denizli, Turkey.

The SpearTek team offers clients a robust product line of middle to high end materials, including marble, travertine, limestone, and ceramic from around the world. Additionally, the company is known for its’ unique product blends and patterns that are artfully choreographed by a team of designers.

SpearTek owners, Kam Tekin and Edward Spearman, work closely with clients and suppliers to provide premium quality products, competitive pricing, and superior service.

TRAVERTINE

Travertine is a natural stone that offers unique features that are unmatched in other types of stone due to the difference in rock formation. Carbon dioxide evasion creates voids in the stone which makes travertine exhibit a beautiful rustic look. Travertine is available in many finishes including tumbled, honed, brushed, filled, unfilled, chiseled and polished.

TILE AND STONE INFORMATION

SHADE VARIATIONS

The color, shade, and pattern of all tile varies to some degree from piece to piece and from production run to production run. In some tiles, these variations are very slight (barely noticeable) and in others they are very extreme (it might look like different color tiles in the same box). Since this wide variety in shading exists, it is important for you to be educated about the tile you are selling and for you to educate your customer.

As previously stated, the color shade of each tile can exhibit anything ranging from a slight variation to an extreme variation. For that reason, it is important to review at least several pieces from the same production run in order to determine acceptable shade variations. Any questions or concerns about your tile selections should be clarified prior to installing.

MARBLE
Marble is a metamorphic rock that is millions of years old and forms from limestone. Metamorphism results in pure white marble. The colors of swirls or veins shown are from minerals, such as iron oxides, silt, sand or clay. Marble offers a sleek, clean look and is easy to maintain. Marble is highly admired for its’ charm, durability, and resistance to fire and erosion.

TILE AND STONE INFORMATION
SHADE VARIATIONS

The color, shade, and pattern of all tile varies to some degree from piece to piece and from production run to production run. In some tiles, these variations are very slight (barely noticeable) and in others they are very extreme (it might look like different color tiles in the same box). Since this wide variety in shading exists, it is important for you to be educated about the tile you are selling and for you to educate your customer.

As previously stated, the color shade of each tile can exhibit anything ranging from a slight variation to an extreme variation. For that reason, it is important to review at least several pieces from the same production run in order to determine acceptable shade variations. Any questions or concerns about your tile selections should be clarified prior to installing.

LIMESTONE
Limestone is a natural material that is millions of years old. This stone is created from the breakdown of other materials, such as sedimentary rocks or shells. It commonly forms in clear, tepid, shallow marine waters. Limestone shows little graining or texture which makes it much smoother than other natural stones.

TILE AND STONE INFORMATION
SHADE VARIATIONS

The color, shade, and pattern of all tile varies to some degree from piece to piece and from production run to production run. In some tiles, these variations are very slight (barely noticeable) and in others they are very extreme (it might look like different color tiles in the same box). Since this wide variety in shading exists, it is important for you to be educated about the tile you are selling and for you to educate your customer.

As previously stated, the color shade of each tile can exhibit anything ranging from a slight variation to an extreme variation. For that reason, it is important to review at least several pieces from the same production run in order to determine acceptable shade variations. Any questions or concerns about your tile selections should be clarified prior to installing.

HAND CRAFTED CERAMIC TILE FROM SPAIN

Ceramic products provide designers and their clients with a color palette that is accessible, but not mundane. Ceramic tile is much more versatile than people think. In bathrooms and kitchens, we are encouraging people to take the wall tile all the way to the ceiling. With the tile sizes and colors available by SpearTek, designers don’t need to worry about a project aging. These colors and shapes will look as fresh in twenty years as they do today.

All of SpearTek’s handmade ceramic tiles are available in a range of sizes, appropriate for all types of ceramic tile applications. SpearTek’s unique handmade ceramic tile production process produces a high-quality, highly durable product that is a much sought-after finishing material for unique home and business designs.

Please note that handcrafted products have inherent irregularities in size, shape, glaze color, texture, and finish. It is our hope that you embrace the variations in the spirit of a custom ceramic product.

TILE AND STONE INFORMATION

SHADE VARIATIONS

The color, shade, and pattern of all tile varies to some degree from piece to piece, and from production run to production run. In some tiles, these variations are very slight (barely noticeable) and in others they are very extreme (it might look like different color tiles in the same box). Since this wide variety in shading exists, it is important for you to be educated about the tile you are selling and for you to educate your customer.

As previously stated, the color shade of each tile can exhibit anything ranging from a slight variation to an extreme variation. For that reason, it is important to review at least several pieces from the same production run in order to determine acceptable shade variations. Any questions or concerns about your tile selections should be clarified prior to installing.
STONE & TILE INFORMATION

TILE AND STONE INFORMATION

SHADE VARIATIONS

The color, shade, and pattern of all tile varies to some degree from piece to piece and from production run to production run. In some tiles, these variations are very slight (barely noticeable) and in others they are very extreme (it might look like different color tiles in the same box). Since this wide variety in shading exists, it is important for you to be educated about the tile you are selling and for you to educate your customer.

As previously stated, the color shade of each tile can exhibit anything ranging from a slight variation to an extreme variation. For that reason, it is important to review at least several pieces from the same production run in order to determine acceptable shade variations. Any questions or concerns about your tile selections should be clarified prior to installing.
SPEARTEK FOLLOWS THE INDUSTRY STANDARD FOUR SHADE VARIATIONS:

- **V1- Uniform Appearance:**
  All pieces from the same production line are similar.

- **V2- Slight Variation:**
  Pieces from the same production line may vary slightly.

- **V3- Moderate Variation:**
  While the colors present on a single piece will be indicative of the colors to be expected on other tiles, the amount of color on each piece will vary slightly.

- **V4- Substantial Variation**
  Random color differences from tile to tile. One tile may have totally different colors from that of other tiles. Thus, the final installation will be unique.
CARE & MAINTENANCE

PLEASE TALK TO A PROFESSIONAL INSTALLER BEFORE INSTALLING. SPEARTEK DOES NOT GUARANTEE PRODUCT AFTER INSTALLATION. USE CONSTITUTES ACCEPTANCE

MAINTENANCE & CARE

The general recommendation for maintaining the beauty of your tile is to use a mild household detergent with a clean wash cloth or sponge. The key is to rinse thoroughly with clean water to remove the dirt and soap residue. For deeper cleaning of surface stains, the use of household white vinegar (five parts water to one part vinegar) and a thorough rinsing with clean water will keep your tile looking fresh and clean for many years to come. A good rule of thumb is to use cleaning products that do not contain phosphoric acid. Do not use abrasive, acidic or strong alkaline cleaners. To clean grout haze, use a weak vinegar solution with a soft rag or a manufactured grout haze remover type cleaner.

INSTALLATION

• For grout joints we recommend 1/8” Note: Smaller joints are possible.
• Loose lay your installation on a flat surface to plan out your cuts, grout lines and decorative inserts
• Pull tile randomly from all the boxes to insure proper blending of your order.

LIMESTONE INSTALLATION

Limestone is one of the most porous natural stones in nature. This high porosity makes it more susceptible to absorption of oils, dirt and grime than other natural stones. You would find it absorbing stains very easily. Most of the times it even absorbs stain from the dye in many grouts. So, before you grout the stone, an appropriate Impregnator must be used as a release. This allows you to have the best possible construction site protection. Application of impregnator’s does not change the natural look of the stone. What the impregnator does is that it resists grout dye absorption, quickens up the removal of grout residue and during construction it also protects the limestone from stains.

RECOMMENDED USES (CERAMIC)

• Interiors walls only
• Walls, counters, vertical and horizontal surfaces
• Showers and baths.

CONSIDERATIONS (CERAMIC)

• Interiors walls only
• Frost-resistant but not frost proof. Please call to discuss specific application if you have questions.
• Certain glazes are acid sensitive. Do not use acid sensitive glazes for countertops, pools or bathrooms. Acids may cause discoloration.
SURFACE TREATMENTS

Surface treatments use various hardening techniques to offer a way to tailor the surface properties of a material without changing the bulk properties. SpearTek provides Honed, Honed & Filled, Brushed, Tumbled, Polished and Split Face surface treatments for our tile and stone products.

- **HONED (H)**
  A honed stone has a satin smooth finish with little or no gloss. If a honed stone is designated “unfilled” (UF), the surface may have visible natural cavities as pictured here.

- **HONED & FILLED (HF)**
  If a honed stone is designated “honed filled” (HF), any natural cavities in the stone have been filled with mortar mixture using fine ground powder of the same stone.

- **BRUSHED FINISH (BR)**
  A brushed stone is finished with a coarse wire brush producing a smooth, though slightly textured, matte finish.

- **TUMBLED FINISH (TMBL)**
  A tumbled stone has rounded edges and corners, often some surface pitting and a powdery finish.
• **POLISHED FINISH (PO)**
  A polished stone has the smoothest finish available on a tile. A polished stone will appear more saturated, have greater color depth and visible detail than other finishes in the same stone.

• **SPLIT FACE FINISH (SPLT)**
  A stone that is considered split face is literally split so that the surface of the stone exhibits a natural quarry texture.
EDGE TREATMENTS AND PROFILES
SpearTek can help you select the right edge treatment or profile for your project.

Edge Treatments:

- **Straight Edge (SE)**
  A clean-cut edge generally achieved by cutting with a diamond blade, gang or wire saw.

- **Chiseled Edge (CH)**
  A process of mechanically chipping the tile edge, thus giving the stone a rustic, aged appearance.

- **Beveled Edge (BVL)**
  A sloped surface contiguous with a vertical or horizontal surface.

- **Tumbled Edge (TMBL)**
  A weathered, aging finish created when the stone is tumbled with sand, pebbles or steel bearings.
Profiles:

- **Step Ogee Profile**
  A molding with stepped edges.

- **Cubic Liner Profile**
  A thin square edge molding.

- **Single Ogee Profile**
  A molding with stepped edges; the topmost having a convex radius.

- **Cornice Profile**
  The stone is finished with a coarse wire brush producing a smooth, though slightly textured, matte finish.

- **Pencil Profile**
  A thin molding with a convex radius connecting the top, front and side planes.
### KEY TO ABBREVIATIONS

- **3D**: Stone with a Curved/Convex (3 Dimensional) Face
- **BASE**: Base Molding
- **BN**: Bull Nose
- **BR**: Brushed
- **BRCH**: Brushed with Chiseled Edge
- **BRSE**: Brushed with Straight Edge
- **BRUF**: Brushed and Unfilled
- **BSKTWV**: Basket Weave
- **BVL**: Beveled
- **CH**: Chiseled
- **CHEV**: Chevron
- **CHEVPLK**: Chevron Plank
- **CNR**: Corner Shelf
- **CO**: Cornice
- **H**: Honed
- **HAR**: Harlequin
- **HBVL**: Honed with Beveled Edge
- **HCH**: Honed with Chiseled Edge
- **HERR**: Herringbone
- **HF**: Honed Filled
- **HMBVL**: Honed with a Micro Beveled Edge
- **HSE**: Honed with a Straight Edge
- **HEX**: Hexagon
- **MBVL**: Micro Beveled
- **OG**: Ogee
- **PEN**: Pencil
- **PINWHL**: Pinwheel
- **PLK**: Plank
- **PO**: Polished
- **POBVL**: Polished with a Beveled Edge
- **POMBVL**: Polished with a Micro Beveled Edge
- **SE**: Straight Edge
- **SPLT**: Split Face
- **SHWR**: Shower Seat
- **TMBL**: Tumbled
- **UF**: Unfilled
- **VFPO**: Vein Cut Filled and Polished with a Straight Edge
- **WK**: Wickerworks
TERS & CONDITIONS OF SALES
By purchasing our natural stone products you agree to the following disclaimers:

PURCHASING:
• Receipt of an electronic or other form of purchase order does not signify SpearTek Tile & Stone LLC’s acceptance of customer order. SpearTek Tile & Stone LLC reserved the right to accept, decline, or delay a customer’s order for reasonable cause including, but not limited to, the lack of availability of products or failure by customer to satisfy payment terms.
• Shipping and handling charges may apply to orders. Prices are subject to change without notice.

RETURNS:
• All returns must be approved by SpearTek Tile & Stone, LLC within 14 days of purchase. A 25% restocking fee plus related freight charges will be charged.
• All returned product must be in original condition to receive credit.
• **SPEARTEK WILL NOT ISSUE A REFUND ON ANY PRODUCT THAT HAS BEEN INSTALLED.**

LIABILITY:
• Quarried natural stone is prone to variations in color, veining, pattern, and texture. Those differences in stone should be considered as the charm and beauty of the material, and not material flaws.
• The actual stone delivered may vary from the picture shown. In addition, any stone ordered at a later date is not guaranteed to match the original stone.
• You may request both a photo of the current lot and customer approval samples, subject to our sampling policy.
